FITS: ALL GENERAL MODELS

CONTENTS

1. 95-069 FILTER-CLUTCH INTAKE PRIMARY. QTY 1
2. INSTALL INSTRUCTIONS 95-069 (THESE INSTRUCTIONS)

INSTALLATION

1. Remove front hood.
2. Locate clutch intake tube, it is the tube on the driver side next to the coolant tank. Clean area as necessary.
3. There is a cut out on the back side of the tube, stuff a shop rag or similar into the cut out to catch shavings.
4. Drill in the center of the tube using a 1½ inch hole saw.

5. Remove shop rag being careful to keep shavings on rag. Vacuum any remaining shavings.
6. Install filter and push all the way until bottoms out on the flat surface.
7. Install hood.

Filter is dry and should be checked periodically. If riding in dusty conditions, inspect filter before each ride and clean filter as necessary.
